

Increased scope of accreditation for Swift Silliker's Chemistry Laboratory!

We are pleased to announce that we have extended our scope of accreditation (SANAS; ISO17025) of our **Chemistry laboratory in Midrand** to include the following additional tests:

- Starch
- Density (beverage products)
- Cholesterol
- Non protein nitrogen on Dairy Products
- Casein (by calculation) on Dairy Products

The following tests are also now offered locally:

- Full fatty acid profile (including trans fatty acids)
- Glycaemic Carbohydrates (by calculation)

We no longer have to send your samples for these analysis to our network of Silliker laboratories in Europe as we are now able to test these in our Midrand laboratory using accredited methods.

Furthermore bringing these tests to Midrand also have the following benefits for all our customers:

- Faster results!
 - Samples no longer have to be shipped.
 - Faster release due to data automatically entered into our system from login to completion.
- Reduced costs
 - No shipment costs to Europe!
 - Competitive cost for local testing
