

Swift Silliker is now trading as Mérieux NutriSciences

After 25 years as South Africa's first and largest commercial food testing laboratory, the Swift Silliker brand is evolving.

Following the announcement of its acquisition in 2012, Swift Silliker will celebrate its 25th year with a new brand identity – one which is internationally synonymous with innovation and reliability in the fields of food, health, cosmetic, environmental and agricultural safety and quality.

As of 1 March 2016, Swift Silliker (Pty) Ltd will officially be trading as **Mérieux NutriSciences**.

“By taking on the Mérieux NutriSciences name, we are emphasising our connection to an international network and subsequently, an extended range of services and facilities which we are able to offer our local clients,” says Valmé Stewart, Managing Director of Swift Silliker. “It is a name we are proud to be associated with and one which encompasses our commitment to customer excellence. We look forward to exciting new developments and offerings under the Mérieux NutriSciences banner in the near future.

About Mérieux NutriSciences

With over 80 accredited laboratories and more than 6000 employees across 21 countries, the Mérieux NutriSciences network works globally with clients as a trusted partner to promote public health through analysis, consulting, auditing, training, contract research and sensory analysis services.
