UNDERSTANDING LABELLING REQUIREMENTS

Course Overview

This workshop offers an in-depth overview of the labelling requirements as stipulated in R146:2012. A brief overview of international requirements will be addressed.

The training will be beneficial to those who have some exposure to labelling requirements, but who wish to acquire a more in-depth, up-to-date understanding.

Practical exercises and case studies will reinforce the key points towards the application of labelling regulation requirements. Opportunities for in-class discussion will allow concerns, examples and improvements to current systems to be addressed.

Course Objectives

The course will provide participants with an understanding of the basic concepts of labelling requirements in South Africa. It will equip the learner with:

- a basic knowledge of labelling regulations
- the knowledge and skills required to apply the labelling requirements
- an understanding of their role in implementing labelling requirements in their work environment.

Entry Level Requirements

Attendees should have had some exposure to food labelling regulations.

Delegates must be comfortable communicating in English and should possess suitable reading and writing skills.

A certificate of attendance will be issued once the course has been successfully completed.

Who Should Attend

- Food safety team leaders
- HACCP (food safety) team members
- Process/product development managers
- Entry level technical staff
- Employees responsible for interpreting food labelling requirements

Duration: One day
Language: English
